Experiences

Maedesign — Founder/Full time

📅 June 2025 - Present

Figma Power BI Wordpress Creative Clouds AI Prototyping

- Designing and developing modern websites using WordPress and Figma, focusing on usability, performance, and responsive design.
- Transform complex requirements into clear visual designs using design thinking and human-centered design principles, ensuring engaging and accessible user experiences.
- Leverage AI-powered design tools and modern web technologies to streamline workflows, prototype concepts, and deliver innovative digital solutions.
- Enhancing user experience by improving website structure, navigation, and visual hierarchy to create intuitive digital experiences.
- Conducted user research and usability testing to validate design decisions and improve digital experiences.
- Built interactive prototypes in Figma to communicate concepts and validate solutions before development.

ZT Servers — QC/ Full-time

📅 Oct 2023 - Oct 2024

Electronics Technical Drawing

- Conducted initial quality inspections of servers and racks in the Quality Department at ZT, ensuring compliance with technical specifications and standards.
- Communicated effectively with floor staff and warehouse teams

Hay Global enterprise — Web designer / part-time

📅 Sep 2022 - Jan 2023

Material UI Figma Creative Clouds WordPress VS Code

- Redesigning the website utilising UI/UX guidelines. The new design incorporated modern aesthetics and streamlined navigation for a more intuitive browsing experience.
- Creating interactive user friendly pages on Wordpress using JavaScript.

Hable Startup —Design intern / part-time

📅 Sep 2021 - Sep 2022

Communication Creative Clouds

- Redesigning the website to increase accessibility for the visually impaired after conducting user testing revealed several key areas for improvement, such as implementing screen reader compatibility and improving color contrast for better readability.
- Creating, editing, and managing the social media content with a focus on expanding the YouTube channel's reach and engagement through strategic planning and a consistent posting schedule.

Education

Industrial design engineering — Twente University

📅 Sep 2019 - Feb 2023

- Fundamentals of engineering mechanics, including statics, dynamics, and mechanics of materials, with applications to product design and analysis.
- Courses: Mechanics of materials, Energy & heat transfer, Technical product modelling, Physical ergonomics, Human factors, and Design sketching.

Industrial design — Alzahra University

📅 Sep 2017 - Aug 2019

- Practical experience designing and developing products in a metal and wood workshop.
- Courses: Design History, Introduction to AutoCad, Wood, Metal, and Plastic Workshops.

Featured Projects

Plant-B

📅 Oct 2022 - Feb 2023

FigmaMaterial UI

- Reduced bedrest within hospitalized patients by 45% through the implementation of user-centered design solutions.
- Designed a platform usability and user experience, for a new mobile app, focusing on intuitive navigation and clear calls to action. Conducted user testing to gather feedback and make necessary improvements for optimal user engagement.

DMD Assisting robotic arms

📅 Mar 2022 - Jun 2022

PythonSolidWorksCO2 Laser

- Designed and prototyped 4 joints robotic arm with 8 DOF and an end effector to play XO.
- Electromyographic (EMG) signals were measured to move the arms

Smart product

📅 Mar 2020 - May 2020

ArduinoRhinoceros 3DSketchbook

- Led the redesign process of a traditional game from ideation to prototype.
- Developed and programmed 3 Arduino boards to trigger alarms within Bluetooth range based on math functions

Certificates

UX/UI design — Udemy

- Mobile and Web Desig
- HTML and CSS

100 days of code — Udemy

- 100 projects in 100 days including data science, automation, build websites, games and apps

Interaction design — Delft university

- One week one-campus workshops to design for kids entertainment on the beach using interaction design framework
- Innovating models and experimenting with different materials

Design for tourism —Braunschweig university

- One week on-campus workshop to design for Kish island toursim anf gfuturefuture of turoism
- Conducting extensive research into urbanization dynamics and the rapid pace of change, leveraging these insights to craft innovative solutions for fostering economic growth.
